

Prader-Willi Syndrome Research Study

The provocations of temper outbursts

What is the purpose of the study?

The Purpose of this study is to gain a better understanding of what provokes temper outbursts in Prader-Willi syndrome. There are two parts to the study, the first is to gather information and the second is to trial a prevention strategy. This study is being led by Professor Stewart Einfeld, Senior Scientist at the BMRI.

Who can participate?

People with Prader-Willi Syndrome aged between 16 and 30 years and their parents/primary carers are invited to participate in this study.

What does the study involve?

The study requires you to participate in a simple over the phone interview.

How do I get involved?

If you are interested in participating in this study you can either call or email Lauren on Phone: 02 9114 4106

Email: lauren.rice@sydney.edu.au
